DETAILED ACTION

Response to Amendment

1. Receipt is acknowledged of the Amendment filed October 11, 2005.

Information Disclosure Statement

2. The information disclosure statement filed November 21, 2005 fails to comply with 37 CFR 1.98(a)(1), which requires the following: (1) a list of all patents, publications, applications, or other information submitted for consideration by the Office; (2) U.S. patents and U.S. patent application publications listed in a section separately from citations of other documents; (3) the application number of the application in which the information disclosure statement is being submitted on each page of the list; (4) a column that provides a blank space next to each document to be considered, for the examiner's initials; and (5) a heading that clearly indicates that the list is an information disclosure statement. The information disclosure statement has been placed in the application file, but the information referred to therein has not been considered.

Allowable Subject Matter

3. Claims 1-26 are allowed.

The following is an examiner's statement of reasons for allowance: one of the cited prior arts, Awatsu, describes a cash processing system for automatically performing cash handling operations associated with banking services. In more detail, Awatsu is about reducing manual operation in placing cash in and collecting cash from a cash handling apparatus to eliminate the possibility of error or theft occurring. Awatsu is about automatically performing cash handling operations. More specifically, Awatsu comprehends a detachable safe, a cash processing

apparatus, and a cash handling apparatus. However, Awatsu does not specifically disclose claimed limitations recited in claim 11 comprising, among other things, the central processing system which is integrated with one of the electronic locking and money control devices and arranged to control operation of the integrated device. Host computer 4b in Awatsu is not "integrated with one of the electronic locking and money control devices and arranged to control operation of the integrated device" in combination with the other recited limitations. Host computer 4b does perform certain host computer operations. Nevertheless, claim 11 recites a specific arrangement that is not suggested. After further search and thorough examination of the present application and in view of the Applicant's arguments, amendments, appeal briefs and the decision of BPAI, claims 1-26 are found to be in condition for allowance over the prior art made of record.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
